SPN-PDM

SPN-PDM introduction

SPN-PDM is fast and easy to use document management system, that can handle your projects, document structures, and version management. When SolidWorks is used with SPN-PDM, references and revision marks are automatically updated during working. Document structure is automatically checked on every check-in.

SPN-PDM basic functionality:

SPN-PDM aims to be compact and easy to use product data management system. SPN-PDM runs on different platforms and provides the compatibility to your environment. Setup is simple and in a one day you will be using the power of SPN-PDM with SPN-Tools embedded!

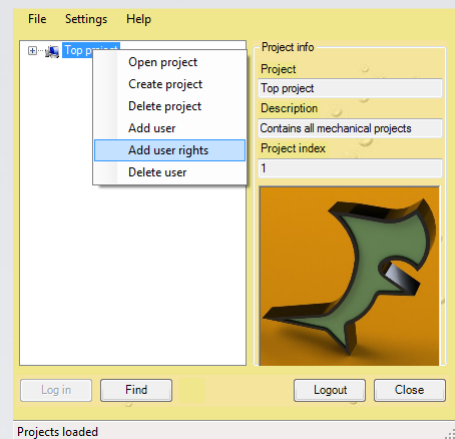

User account management is easy and can be done straight from the SPN-PDM client when connected as administrator.

Project creation is is pretty much similar as creating folder on your hard disk: create project and give permissions to users for your created project.

SPN-PDM is used with SPN-Tools on SolidWorks to get the most advanced user experience.

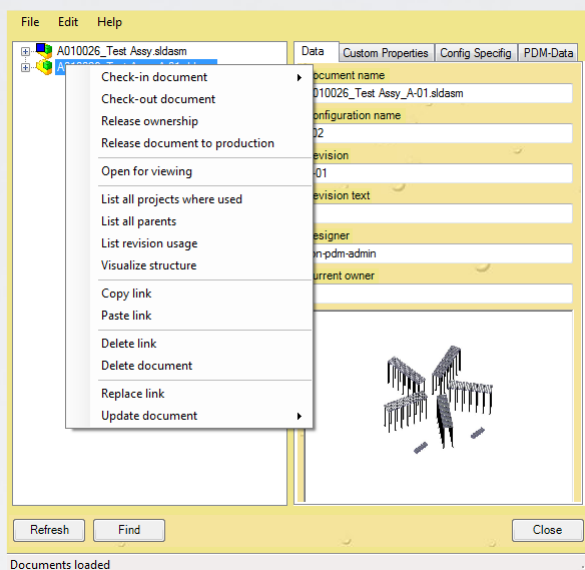

By default SPN-PDM does manage your SolidWorks designs in structural way, instead of one file per time.

SPN-PDM has unique project management feature which enables the possibility to also manage your files in project level when the documents are used in multiple projects.

SPN-PDM Advanced Functionality:

SPN-PDM has great finding tool which directs straight to projects where document has been used. You can find with any attribute that you have configured to PDM or with document names.

In SolidWorks usage, SPN-PDM also shows preview-images which can be also increased. Revision tables are automatically created/updated on every check-out.

SPN-PDM supports all kinds of files, including office, etc. SPN-PDM can handle almost any type of files, but not files over 2GB size.

SPN-PDM keeps your files unique: there will be no duplicates and unwanted copies, even if you use the same files in multiple projects. Documents are always linked and kept safe of modifications by mistake.

SPN-Technologies services for SPN-PDM:

SPN-Technologies can come to your office and set-up SPN-PDM for you. In same time we can check your other systems compatibility and make full analyze for your working environment.

SPN-Technologies also offers bundled hardware + software setup for you and sending the preconfigured system to your office. Your only actions will be just plug the system in the grid and you are ready to go!
